SERVICING OF A LIFEJACKET

- Before any work is carried out on a lifejacket the Inflators must be inflated and checked for fitness for purpose.
- If the inflator is damaged, under **NO CIRCUMSTANCE SHOULD IT BE REPAIRED.**
- A damaged or previously repaired inflator will need replacing; (this may make the jacket beyond economical repair)
- Once the inflator has passed service testing all other components can be assessed / serviced.
- If additional repairs have been undertaken at CREWSAVER the Inflator must be rechecked upon return to the service centre
